DAKAFLASH

AUSTRALIA'S BEST VALUE LEAD FREE FLASHING

Dakaflash incorporates the reinforced aluminium mesh from Wakaflex with the creped aluminium top sheet and butyl backing from Smartform

Dakaflash is a composite laminate flashing consisting of a creped aluminium top sheet with a fully self-adhesive butyl backing. Embedded into this adhesive is the same aluminium mesh that's inside Wakaflex, which gives Dakaflash rigidity and support, as well as allowing for a smooth contoured finish on the roof surface. Dakaflash can stretch up to 30% in length and has a two-piece protective HDPE backing.

BEST FOR - New build homes, second storey additions, abutments, chimneys, and flashing maintenance. Use on tile, metal, and polycarbonate roofs.

PRODUCT FEATURES

- Fully self-adhesive butyl backing
- Internal aluminium mesh
- BAL-19 approved
- Creped aluminium surface

TECHNICAL INFORMATION

- Complies with AS/NZS 2904:1995 'Damp Proof Courses and Flashing'

Black	●	●	●
Terracotta	●	●	●

FULLY SELF-ADHESIVE BUTYL BACKING

Being fully butyl backed ensures a neatly sealed and completely waterproof flashing.

INTERNAL ALUMINIUM MESH

Embedded inside each roll is an aluminium honeycomb mesh that provides a lasting profile of the roof and stops any lifting.

CREPED ALUMINIUM SURFACE

Dakaflash has a creped aluminium top sheet which allows it to stretch up to 30% in length.
